

Best Agrolife Limited

(An ISO 9001 : 2015 Certified Company)

A Meaningful Combination
To Eliminate All Life Stages
Of White Fly

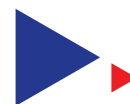

HEALTHY COTTON
Dose:
400 ml
Per Acre
HIGHER YIELD

Pack size :
1 Ltr, 500 ml, 250 ml & 100 ml

PYDON (Pyriproxyfen 5% + Diafenthiuron 25% SE)

Mode of Action ►

Pydon is a novel & very meaningful combination of Pyriproxyfen + Diafenthiuron in a very effective & safer formulation - SE.

Pyriproxyfen being an IGR controls eggs & larvae of whitefly & Diafenthiuron controls adult & larvae thus making it very effective against complete life cycle of whitefly.

Recommendation ►

It is used for control of Whitefly (*Bemisia tabaci*), Thrips (*Thrips tabaci*), Jassid (*Amrasca biguttula biguttula*) and Aphid (*Aphis gossypii*) in cotton.

Crop (S)	Common Name of Pest	Dosage / HA		Dilution in water (Litre)
		a.i. (g)	Formulation (ml)	
Cotton	Whitefly (<i>Bemisia tabaci</i>), Thrips (<i>Thrips tabaci</i>), Jassid (<i>Amrasca Biguttula Biguttula</i>), Aphid (<i>Aphis gossypii</i>)	250+50 to 312.5+ 62.5	1000 to 1250	500

Method of Use ►

Plant Protection Equipment : Knapsack sprayer fitted with hollow cone nozzle.
