

SPRINK™

BIO STIMULANT - LIQUID

- A bio stimulant, a natural seaweed extract-based product used to promote plant growth.
- It's formulated from the brown seaweed *Ascophyllum nodosum* and contains bioactive compounds, growth hormones, and essential nutrients that benefit plant metabolism, root development, and stress resistance.
- This type of product is suitable for various crops and aims to enhance yields, improve fruiting, and support overall plant health.

Application:

- Dose - 600 ml/acre
- Method - Foliar Spray
- Time - Vegetative & Reproductive Stage

Presentation: 1 lt, 500 ml & 250 ml

Natural and organic

Derived from seaweed, a renewable resource.

Process of Photosynthesis is accelerated

Increase the glycine betaine amount and enhancement process of photo synthesis.

Uptake nutrient

Promotes rapid uptake of a range of nutrients in chelated form.

Anti oxidant activity/stress resistance

Helps plants withstand various environmental stressors like drought, salinity, and nutrients deficiency. Vitalizes plants and induces tolerance to pests and diseases.

Fruit, flower & root development

Promotes new fruit & flower formation & provides balanced nutrition.
